Best Buy Tickets

Susie is organizing the printing of tickets for a show her friends are producing.
She has collected prices from several printers and these two seem to be the best.

<table>
<tr>
<td>
SURE PRINT
Ticket printing
25 tickets for $2
</td>
<td>
BEST PRINT
Tickets printed
$10 setting up
plus
$1 for 25 tickets
</td>
</tr>
</table>

Susie wants to go for the best buy

She doesn't yet know how many people are going to come.

Show Susie a couple of ways in which she could make the right decision, whatever the number.

Illustrate your advice with a couple of examples.
